This book analyzes the role that human forms play in visualizing practical information and in making that information understandable, accessible, inviting, and meaningful to readers—in short, "humanizing" it. Although human figures have long been deployed in practical communication, their uses in this context have received little systematic analysis. Drawing on rhetorical theory, art history, design studies, and historical and contemporary examples, the book explores the many rhetorical purposes that human forms play in functional pictures, including empowering readers, narrating processes, invoking social and cultural identities, fostering pathos appeals, and visualizing data. The book is aimed at scholars, teachers, and practitioners in business, technical, and professional communication as well as an interdisciplinary audience in rhetoric, art and design, journalism, engineering, marketing, science, and history.

This invaluable reference is for the serious car collector as well as anyone who wants to know the value of a collector car they are looking to buy or sell. Prices in this must-have reference reflect the latest values, in up to six grades of condition, from the esteemed Old Cars Price Guide database. New information for the most recent model year will also be added to our new Old Car Report database.

MacKayla Lane's life is good. She has great friends, a decent job, and a car that breaks down only every other week or so. In other words, she's your perfectly ordinary twenty-first-century woman. Or so she thinks . . . until something extraordinary happens. When her sister is murdered, leaving a single clue to her death—a cryptic message on Mac's cell phone—Mac journeys to Ireland in search of answers. The quest to find her sister's killer draws her into a shadowy realm where nothing is as it seems, where good and evil wear the same treacherously seductive mask. She is soon faced with an even greater challenge: staying alive long enough to learn how to handle a power she had no idea she possessed—a gift that allows her to see beyond the world of man, into the dangerous realm of the Fae. . . . As Mac delves deeper into the mystery of her sister's death, her every move is shadowed by the dark, mysterious Jericho, a man with no past and only mockery for a future. As she begins to close in on the truth, the ruthless Vlane—an alpha Fae who makes sex an addiction for human women—closes in on her. And as the boundary between worlds begins to crumble, Mac's true mission becomes clear: find the elusive Sinsar Dubh before someone else claims the all-powerful Dark Book—because whoever gets to it first holds nothing less than complete control of the very fabric of both worlds in their hands. . . . Look for all of Karen Marie Moning's sensational Fever novels: DARKFEVER | BLOODFEVER | FAEFEVER | DREAMFEVER | SHADOWFEVER | ICED | BURNED | FEVERBORN | FEVERSONG
BONUS: This edition contains an excerpt from Karen Marie Moning's Bloodfever.

In this revolutionary book, a renowned computer scientist explains the importance of teaching children the basics of computing and how it can prepare them to succeed in the ever-evolving tech world. Computers have completely changed the way we teach children. We have Mindstorms to thank for that. In this book, pioneering computer scientist Seymour Papert uses the invention of LOGO, the first child-friendly programming language, to make the case for the value of teaching children with computers. Papert argues that children are more than capable of mastering computers, and that teaching computational processes like de-bugging in the classroom can change the way we learn everything else. He also shows that schools saturated with technology can actually improve socialization and interaction among students and between students and teachers. Technology changes every day, but
