Although there's no cure for ADHD, it can be managed with appropriate educational support, advice and support for parents and affected children, alongside medicine, if necessary. Medicine is often the first treatment offered to adults with ADHD, although psychological therapies such as cognitive behavioural therapy (CBT) may also help.

Attention deficit hyperactivity disorder (ADHD) - NHS

ADHD is a chronic condition of the brain that makes it difficult for children to control their behavior. According to national data, ADHD affects about 9.4% of U.S. children ages 2-17—including 2.4% of children ages 2-5 and 4%-12% of school-aged children. Learn more here about the 3 groups of ADHD behavior symptoms.

Understanding ADHD: Information for Parents ...

Stimulants are the best-known and most widely used ADHD medications. Between 70-80% of children with ADHD have fewer ADHD symptoms when taking these fast-acting medications. Nonstimulants were approved for the treatment of ADHD in 2003. They do not work as quickly as stimulants, but their effect can last up to 24 hours.
