Preliminaries: Two-Sector Models ~~3~~ not need to occur: instead, we can have relative demand intersect one of the flat seg-ments of relative supply, so that the equilibrium price with trade the autarky equals price in one country.1 Focusing on the case where ppa< p), we can go back to the PPF of each country and graph the production and consumption points with free trade.

~~Preliminaries: Two-Sector Models - Princeton University~~

It builds on David Ricardo's theory of comparative advantage by predicting patterns of commerce and production based on the factor endowments of a trading region. The model essentially says that countries export products that use their abundant and cheap factors of production, and import products that use the countries' scarce factors.
