The article reconstructs the history of the Italian state-owned holding Finmeccanica, which since its birth in 1948 lived through a number of corporate reorganizations (shipyards, automobiles with Alfa Romeo, energy) and is now one of the leading European companies in aerospace and defence.

The fascinating world of Alfa Romeo is recounted in this history of the legendary automaker, while showcasing its finest models. Recognized for their sleek and sexy design, high performance, and innovative technology, Alfa Romeo cars have been admired for over a century. The famous exclamation by Henry Ford "When I see an Alfa Romeo go by, I tip my hat!" underlines the prestigious tradition and the legendary stories that make Alfa Romeo one of the major players in the automobile world. Beginning with the history of the Alfa Romeo company itself, this lavish book includes rare archival material, some published here for the first time, along with historical posters and advertisements for Alfa Romeo, many of which were designed by famous artists and illustrators. Alfa Romeo was one of the first brands to be collected by vintage car fans and even today its models are highly renowned. The latter half of the book features an overview of eighty models belonging to private collections, from 1910 to the present day. An impressive selection of vintage photographs is accompanied by brief, informative texts that focus on the chief characteristics of each of the vehicles illustrated. Featuring a preface by Mario Andretti, this book is essential for any rare automobile aficionado.

The story of Alfa Romeo, the prestigious Italian marque which created some of the most memorable cars of all time during its 100 year-plus history, is told by specification after specification in a "virtual gallery" of many of the models produced by the company, both road-goers and racers. The 1750 GS of the 1930s, the 8C 2900 B, the Giulietta, the Giulia, the 33s, the Alfettas right up to the most modern 8C Competizione are just some of the cars that find a place in this long catalog in which the illustrations of Michele Leonello, the authoritative car designer, come together with the words of Lorenzo Ardizio, the expert on the history of Alfa Romeo.

Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark cylinder head mods, big-brake mods, LSD adjustment procedure, electrical system improvements, plus many flow-bench diagrams, dyno plots, and much more.

It has been 110 years since Alfa Romeo was founded. A name that has become synonymous with cars, so important has its presence been both industrially and in motorsport. Over this long period of time, the celebrated Italian manufacturer has created cars that have become part of motoring history such as the 1900, the Giulietta, the Giulia and the Alfetta. At the same time, Alfa Romeo has enjoyed an outstanding sporting career, winning all of the most significant races and titles, among them the Mille Miglia, the 24 Hours of Le Mans, the Tourist Trophy and the Formula 1 World Championship. This book, which first appeared in 2010 when Alfa Romeo (under the title 'Alfa Romeo 1910-2010') celebrated its first century, was written by the late Maurizio Tabucchi, an expert on the history of the marque, who passed away a few years ago. His work has now been updated to include all the latest models produced from 2017 to the present day such as the Stelvio and the Giulia Quadrifoglio Verde. The book has been completed with an examination of the Alfa Romeo marque’s return to competition in partnership with Sauber, demonstrating that its “sporting heart” is still beating as strongly as ever.

Examines the history of the Alfa Romeo automobile, highlighting the racing history, discussing notable leaders in the company, and describing the technological innovations of the vehicle.

The Alfa Romeo 105 series Spider is one of the most admired drop-head sports cars to come out of Italy. Launched in 1966, its radical new look was not immediately welcomed. As prospective buyers gradually warmed to the model, enhancements were introduced including more powerful engines and higher-spec body and interior fittings. Despite its inauspicious start, production of this much-admired car lasted for twenty-seven years, finally stopping in 1993. Jim Talbott and Andrew Brown pay homage to the 105/115 series Alfa Spider. With over 330 photographs, many specially commissioned, this new book describes the Alfa Romeo company history including its philosophy of incorporating driver appeal into all of its products, resulting in some of the most desirable vehicles of their age; it details the evolution of the 105/115 series through four distinct body styles; lists the technical design specifications and every major version of the Spider and finally, discusses the issues and challenges of finding and owning a classic Spider.

Head gasket repairs, valve adjustments, camshaft timing, carb and SPICA fuel injection tuning, and driveshaft donut replacement are all explained. Experienced, hands-on guidance thatll keep you in the drivers seat.

Following in the tracks of the author’s well-known Alfa DOHC tuning manual, Jim Kartalamakis describes all kinds of useful information and techniques to increase power, performance and reliability of V6 Alfas and their engines. This book is the result of much research and firsthand experience gained through many projects concerning Alfa V6 rear-wheel drive models, from the GTV6 series to the last of the 75 3.0 models. A wealth of completely new information can be found here regarding cylinder head mods, big brake mods, LSD adjustment procedure, suspension modifications for road and track, electrical system improvements, flowbench diagrams, dyno plots, and much more!

Introduces the Alfa Romeo automobile company, discussing the company's success, its racing history, and notable models.
