Book cover: Ancient Roman Gardens

Book cover: Ancient Roman Gardens

Ancient Roman Gardens is the first comprehensive account of gardens and gardening in the Roman period, creating a fascinating new dimension to our understanding and appreciation of life and society in ancient Rome, and adding an important chapter to the history of gardening and horticulture. Linda Farrar traces the development of Roman gardens from their humble origins as vegetable patches to the sophisticated forms seen at the height of the Empire. She considers all types of gardens - domestic and public, in town and country, large and small in scale - and her study features evidence from gardens in Italy and from sites throughout the provinces of the Empire. Literature, frescoes, mosaics and extensive archaeological research provide information which is brought together to give a vivid account of the rich variety of Roman gardens. Recent research has revealed much about the garden plants favoured by the Romans, and the text describes how these plants were used - for garlands, to make wines, cordials and foodstuffs, to provide nectar for honeybees. The many architectural features and sculptures so beloved of the Roman gardener are also covered, as are the habits of Roman gardeners, their tools and horticultural techniques. Ancient Roman Gardens will appeal strongly to anyone who has a keen interest in ancient history and archaeology, as well as to classicists and art historians. It will also be fascinating reading for gardeners in general, for landscape gardeners in particular, and for all garden historians. -- Book cover.

From the earliest of times people have sought to grow and nurture plants in a garden area. Gardens and Gardeners of the Ancient World traces the beginning of gardening and garden history, from Ancient Egypt and Mesopotamia, to the Minoans and Mycenaeans, Greeks, Etruscans and Romans, through Byzantine, Islamic and Persian gardens right up to the Middle Ages. It shows how gardens in each period were designed and cultivated. Evidence for garden art and horticulture is gathered from surviving examples of ancient art, literature, archaeology, actual period gardens that have survived the centuries and the wealth of garden myths associated with certain plants. These sources bring ancient gardens and their gardeners back to life, and provide information on which plants were chosen as garden worthy, their setting and the design and appearance of ancient gardens. Deities associated with aspects of gardens and the garden's fertility are featured - everyone wanted a fertile garden. Different forms of public and domestic gardens are explored, and the features that you would find there; whether paths, pools, arbors and arches, seating or decorative sculpture. The ideal garden could be like the Greek groves of the Academy in Athens, a garden so fine that it was comparable with that of the mythical king Alcinoo's, the paradise contemplated by the Islamic world, or a personal version of a garden of Eden that Early Christians could create for themselves or in the forecourt of their churches. In general books on garden history cover all periods up to the present, often placing all ancient gardens in one chapter at the beginning. But there is so much of interest to be found in these early millennia. Generously illustrated with 150 images, with plant lists for each period, this is essential reading for everyone interested in garden history and ancient societies.

A study of aspects of urban and rural Roman horticulture. Limited by the available evidence, most of the discussion relates to decorative gardens, making use of literary sources and depicions on wall paintings. It is a particularly refreshing subject as gardens are frequently overshadowed by archaeological emphasis on recovering architectural structures. Farrar looks at common types of plants, ornamentation, layout and the evolution of design.

In this beautifully illustrated book, Maureen Carroll examines the most recent evidence of the existence of ancient gardens, the horticultural practices used to plant and maintain them, and the many forms and functions they assumed. Surveying the ancient Near East, Egypt, Greece, Italy, and the provinces of the Roman Empire from the second millennium B.C. to the middle of the first millennium A.D., Carroll finds that whether grown as sources of food, symbols of wealth and prestige, or dwellings for the gods, the cultivation of gardens played an integral role in both the public and private spheres of the ancient world. She concludes with a chapter on the survival of ancient gardening traditions in the Islamic and Byzantine worlds and the ways in which gardens have figured in these cultures' perceptions and depictions of paradise. Culling evidence from a wide variety of archaeological, textual, and pictorial sources, and illustrated with delightful images from tomb and wall paintings, sculptural reliefs, manuscripts, and reconstructions, Carroll provides fascinating insights into the earthly paradises of antiquity.

A fascinating look at the history and legacy of Roman gardens, focusing on Great Britain. The author is a board member of the Association for Roman Archaeology and a prolific writer of papers on Roman art and architecture and has lectured on the subject of Roman gardens.

In Gardens of the Roman Empire, the pioneering archaeologist Wilhelmina F. Jashemski sets out to examine the role of ancient Roman gardens in daily life throughout the empire. This study, therefore, includes for the first time, archaeological, literary, and artistic evidence about ancient Roman gardens across the entire Roman Empire from Britain to Arabia. Through well-illustrated essays by leading scholars in the field, various types of gardens are examined, from how Romans actually created their gardens to the experience of gardens as revealed in literature and art. Demonstrating the central role and value of gardens in Roman civilization, Jashemski and a distinguished, international team of contributors have created a landmark reference work that will serve as the foundation for future scholarship on this topic. An accompanying digital catalogue will be made available at: www.gardensoftheromanempire.org.

This text traces the history of mosaics, examining its chronological evolution from Hellenistic to Early Christian times and its regional variations. Topics discussed include mosaic technique and workshop organization and the relationship of mosaic to other forms of interior design.

"Thanks to this volume, the reader can visit the Roman houses of Pompeii, Herculaneum, Boscoreale, Oplontis, and Rome that display superb Roman frescoes on their walls ... An essay by Donatella Mazzoleni highlights the connections between Roman architecture and the programs of illusionistic wall paintings employed in these magnificent structures. Umberto Pappalardo examines the Roman domestic ideal and its realization in wall painting and through other elements of interior decoration. The two essays precede a sumptuously illustrated guide to twenty-eight of the most beautiful houses - among them, the Villa of the Mysteries, the House of the Vettii, and the House of the Faun in Pompeii; the House of Livia, the Villa Farnesina, and the Domus Aurea in Rome; the House of the Grand Portal in Herculaneum; and the Villa of Publius Fannius Synistor in Boscoreale." --BOOK JACKET

Drem longs for the day he will win his Warrior Scarlet. But with a withered spear arm, how will he take part in the ritual Wolf Slaying which will prove his worth as a man of the tribe? With over forty books to her credit, Rosemary Sutcliff is now universally considered one of the finest writers of historical novels for children. Winer of the Carnegie Medal and many other honours, Rosemary was awarded a CBE in 1992 for services to children's literature.

Romans loved their gardens, whether they were the grand gardens of imperial country estates or the small private spaces tucked behind city houses. They treasured gardens both as places for relaxation and as plots to grow ornamental plants as well as fruits and vegetables. The soothing sound of bubbling fountains often added further to the pleasures of life in the garden. Romans constructed gardens in every corner of their empire, from Britain to North Africa and from Portugal to Asia Minor. Long after their empire collapsed, the gardens they had so carefully planted continued to exert influence in the farflung corners of their former world. This book describes the variety of Roman gardens throughout the empire, from the humblest to the most lavish, including such well-known places as Hadrian’s Villa in Tivoli and the gardens of Pompeii and Herculaneum. The continued influence of Roman gardens is traced though Arabic, medieval,

and Renaissance gardens to the present day. Many of the lavish illustrations were commissioned for this book.
