Successful candidates at this stage will be invited to attend an Information evening.

In a critical analysis of conventional understanding, leading authors Claire Davis and Marisa Silvestri present bold new conceptualisations of police leadership. Drawing on empirical research in criminology, sociology and leadership studies, they present a thoughtful critique of the nature and practice of leadership in contemporary policing. The book: - Critically explores the identities of leaders and their positions within wider organisational structures and processes. - Provides a critique of contemporary reform to police professionalisation, training and education. equalities and diversity by situating these developments within wider historical, social and political context; - Draws on critical theory to offer an alternative, challenging and novel interpretation of police leaders as not simply the result of individual experiences and attitudes, but of the social, institutional and historical processes of policing and the cultures that exist within it; - Points towards future directions and a reimagining of leadership in the police. Accessible and stimulating, this is an essential text for policing students and valuable reading for current leaders and those interested in policing, criminology and leadership.

Behavioural skills are essential to effective policing practice and professional development, and are also embedded within the policing competency frameworks. As the police service looks to further redefine its role in the twenty-first century, this critical handbook covers the full range of these proficiencies, from building rapport, applying emotional intelligence, building empathy and resilience to diversity and difference, understanding ethics, and developing coaching and leadership skills. Each chapter is written by a distinguished serving or former senior police leader and/or policing scholar, bringing together a wealth of experience and understanding and applying this knowledge in context through key case studies and examples. Suitable for serving police officers at all levels, as well as policing lecturers and students aspiring to join the police, this book encourages and enables a people-centred approach to policing that balances the debate that has given disproportionate credence to transactional skills at the expense of a more transformational approach.

Because police are the most visible face of government power for most citizens, they are expected to deal effectively with crime and disorder and to be impartial. Producing justice through the fair, and restrained use of their authority. The standards by which the public judges police success have become more exacting and challenging. Fairness and Effectiveness in Policing explores police work in the new century. It replaces myths with research findings and provides recommendations for updated policy and practices to guide it. The book provides answers to the most basic questions: What do police do? It reviews how police work is organized, explores the expanding responsibilities of police, examines the increasing diversity among police employees, and discusses the complex interactions between officers and citizens. It also addresses such topics as community policing, use of force, racial profiling, and evaluates the success of common police techniques, such as focusing on crime 'hot spots.' It goes on to look at the issue of legitimacy'how the public gets information about police work, and how police are viewed by different groups, and how police can gain community trust. Fairness and Effectiveness in Policing will be important to anyone concerned about police work: policy makers, administrators, educators, police supervisors and officers, journalists, and interested citizens.

The objective of this book is to review the position of investigative interviewing in a variety of different countries, with different types of criminal justice systems, and consists of chapters written by leading authorities in the field, both academics and practitioners. A wide range of often controversial questions are addressed, including issues raised by the treatment of detainees at Guantanamo Bay, The Reid model for interviewing and miscarriages of justice, the role of legislation in preventing bad practice, the effectiveness of ethical interviewing, investigative interviewing and human rights, responses to miscarriages of justice, and the likely future of investigative interviewing. The book also makes comparisons between British and American approaches to detention without trial, and the role of confession evidence within adversarial legal systems. It also develops a set of proposals to minimise the risks of miscarriages of justice, irrespective of jurisdiction.

For creating a balance in the organizational environment, harmony amongst the employees and the employer is a prerequisite. The factors that help in determining an organizational balance are the sociology of an environment, psychology of the people working there, channels of communication along with a sound and rational management. The book highlights the fundamental concepts of organizational behaviour, and its applications in the Indian organizational scenario. The second edition of the book, maintaining the same chapters' organization as in the previous edition, comprises 28 chapters based on the fundamental concepts of organizational behaviour, and case studies from various Indian industry verticals. These case studies reveal the authors' experience in real-life scenario as consultants as well as their observations pertaining to the concepts of organizational behaviour. Besides, the text lays emphasis on some modern tools of management such as TQM, BPR and Knowledge Management, which is a unique feature of this book. The book is designed for the students of management and psychology. Moreover, it is useful for the postgraduate students of commerce as well as it is of immense use to the personnel associated with technical, commercial and IT-based industries requiring human resource management. KEY FEATURES [] Every chapter is concluded with a real-life case study. [] Appendices added to most of the chapters contain research-based questionnaire instruments. [] Discussion Questions on Case studies enhance learning among students. NEW TO THE SECOND EDITION Includes three new sections on 'Case Study Method as an Important Pedagogy', 'Classification of Case Studies' and 'Steps of Solving a Case'. Incorporates 29 new short and sharp cases at the end of the book to make the reader aware of real-life situations. TARGET AUDIENCE [] MBA / PGDM / BBA [] BA (Hons.) Psychology [] MCom

Built on a foundation of nearly 1,200 references, Leadership and Management in Police Organizations is a highly readable text that shows how organizational theory and behavior can be applied to improve the operations, leadership, and management of law enforcement. Author Matthew J. Giblin emphasizes leadership and management as separate skills in successful police supervisors and executives, illustrating to students how the two skills combine to improve individual and organizational efficacy in policing. Readers will come away with a stronger understanding of why organizational decisions matter and the impact research can have on police departments.

The second edition of this popular international handbook highlights the developing relationship between psychology and the law. Consisting of all-new material and drawing on the work of practitioners and academics from the UK, Europe, North America and elsewhere, this volume looks not only at the more traditional elements of psychology and the law - the provision of psychological assessments about individuals to the courts - but also many of the recent developments, such as the interaction between psychologists and other professionals, decision-making by judges and juries, and the shaping of social policy and political debate. Contemporary and authoritative in its scope, the second edition of The Handbook of Psychology in Legal Contexts will again prove to be a valuable resource for scholars and students, as well as being a vital tool for all professionals working in the field. * Well known editors and an international list of authors, most of whom are leaders in their field * Focus on psychological concepts and knowledge that will enlighten best practice and research * The focus on process and issues ensures that the book is not limited in interest by specific legal codes or legislation, it is international * More than an updating of the old chapters, really a rethinking of the field and what is now important and emerging

This book offers strategies to resolve common challenging behaviours using a low arousal approach - a non-aversive approach based on avoiding confrontation and reducing stress. It explains challenging behaviours, and offers guidance on how families can manage different types of challenging behaviour, such as physical aggression and self-injury.
