'This book bridges disciplines, previously confined to specialist journal publications, by providing a comprehensive overview of the systems analysis application to water resources. It is ideal for Masters-level courses in Water Resources Engineering where modern management techniques of optimization and modelling are highly important in the strategic management of a vital resource.' Derek Clarke, University of Southampton, UK 'The great novelty of this book is

that it presents in detail how fuzzy-set theory can be used in water resource system management. The author was one of the pioneers who opened up this new field and is considered to be one of the greatest experts in it.' Rodolfo Soncini Sessa, Politecnico di Milano, Italy Water resources management is increasingly interdisciplinary and must take into account complex socioeconomic factors and environmental variables. This book describes the 'systems approach' and its application to contemporary water resources management, focusing on three main sets of tools: simulation, optimization and multi-objective analysis. This approach is presented within the context of sustainable planning and development under conditions of uncertainty. *Managing Water Resources: Methods and Tools for a Systems Approach* introduces system dynamic simulation as a tool for integrated modelling and contains coverage of the use of fuzzy sets for incorporating objective and subjective uncertainties. The book combines theory with many practical examples, as well as including programs and exercises on an accompanying CD-ROM. It comprises both an advanced text for students of water resources and civil or environmental engineering and a practical guide for professionals. Published jointly with UNESCO and International Hydrological Programme

Sold! The magic word. The holy grail. Why are some salespeople remarkably successful, while others make call after call with no results? How do some turn any no into a yes, while others can't even get their foot in the door? For the first time, more than 70 of the most successful salespeople in the world have come together to reveal their secrets to success. You'll learn what makes these outstanding sellers true masters of their craft—and how you can adapt the masters' tactics for your own. Learn Martha Stewart's secrets to promoting yourself as an expert. Discover the 11 key questions to ask from Harvey McKay. Get Anthony Parinello's advice on selling to CEOs. Be trained in guerrilla tactics for direct selling from Jay Conrad Levinson. Find out Brian Tracy's secrets on the psychology of selling. Bursting with valuable advice from Jack Canfield, Anthony Robbins, Keith Ferrazzi, Tom Hopkins, Al Lautenslager and more than 60 other masters of the art of selling, this exclusive compilation of the best sales strategies ever known puts you on the fast track to sales success.

There are more historical newspaper resources than you think--and they're easier to access than you know. When researched properly, no other type of record can beat historical newspapers in "taking the pulse" of their times and places, recording not just the names, but also information important to the community. This comprehensive how-to guide will show you how to harvest the "social media" of centuries past to learn about your ancestors and the times and places they lived in. With step-by-step examples, case studies, templates, worksheets, and screenshots, this book shows you what you can find in online (and offline) historical newspapers, from city dailies to weekly community papers to foreign-language gazetteers. *The Family Tree Historical Newspapers Guide* features:

- Tips and techniques for finding crucial genealogy records in newspapers, such as birth announcements, obituaries, and even news reports
- Step-by-step guides for using popular online newspaper databases such as GenealogyBank and Newspapers.com
- Case studies that will put information found in newspapers to use

This guide helps faculty and student affairs practitioners better serve graduate and professional school students as they navigate what can be an isolating, taxing, and unfamiliar context. Providing actionable strategies, as well as a common language for practitioners to

advocate for themselves and for their students, this book is a quick start manual that defines current issues around graduate and professional student development. Drawing together current resources and research around post-baccalaureate student outcomes, this book explores the diverse student needs of graduate and professional students and provides a clear understanding of their social, personal, and psychological development and how to support their success. Case studies showcase specific examples of practice including a holistic development model for graduate training; integrating academic, personal, professional, and career development needs; promising practices for engagement; a diversity, equity, and inclusion approach to access and outcomes; how graduate schools can be important partners to student affairs professionals; and examples of assessment in action. This book provides tools, resources, communication strategies, and actionable theory-to-practice connections for practitioners, professionals, and faculty at all levels who work to support post-baccalaureate student thriving. Appendix available for download online at www.routledge.com/9780367639884 on the tab that is entitled "Support Material."

At a time when college completion is a major issue, and there is particular concern about the retention of underserved student populations, peer mentoring programs offer one solution to promoting student success. This is a comprehensive resource for creating, refining and sustaining effective student peer mentoring programs. While providing a blueprint for successfully designing programs for a wide range of audiences – from freshmen to doctoral students – it also offers specific guidance on developing programs targeting three large groups of under-served students: first-generation students, international students and student veterans. This guidebook is divided into two main sections. The opening section begins by reviewing the issue of degree non-completion, as well as college adjustment challenges that all students and those in each of the targeted groups face. Subsequent chapters in section one explore models of traditional and non-traditional student transition, persistence and belonging, address what peer mentoring can realistically achieve, and present a rubric for categorizing college student peer-mentoring programs. The final chapter in section one provides a detailed framework for assessing students' adjustment issues to determine which ones peer mentoring programs can appropriately address. Section two of the guidebook shifts from the theoretical to the practical by covering the nuts and bolts of developing a college student peer-mentoring program. The initial chapter in section two covers a range of design issues including establishing a program timeline, developing a budget, securing funding, getting commitments from stakeholders, hiring staff, recruiting mentors and mentees, and developing policies and procedures. Subsequent chapters analyze the strengths and limitations of different program delivery options, from paired and group face-to-face mentoring to their e-mentoring equivalents; offer guidance on the creation of program content and resources for mentors and mentees, and provide mentor training exercises and curricular guidelines. Section two concludes by outlining processes for evaluating programs, including setting goals, collecting appropriate data, and methods of analysis; and by offering advice on sustaining and institutionalizing programs. Each chapter opens with a case study illustrating its principal points. This book is primarily intended as a resource for student affairs professionals and program coordinators who are developing new peer-mentoring programs or considering refining existing ones. It may also serve as a text in courses designed to train future peer mentors and leaders.
