The history of Chinese medicine hinges on three major turning points: the formation of canonical theory in the Han dynasty; the transformation of medicine via the integration of earlier medical theories and practices in the Song dynasty; and the impact of Western medicine from the nineteenth century onwards. This book offers a comprehensive overview of the crucial second stage in the evolution of Chinese medicine by examining the changes in Chinese medicine during the pivotal era of the Song dynasty. Scholars often characterize the Song era as a time of change in every aspect of political, social, intellectual or economic life. More specifically it focuses on three narratives of change: the emperor's interest in medicine elevated the status of medicine in the eyes of the elite,

enjoying their confidence it is practised in China in parallel with modern Western medical treatment. In addition to scientific organisations dedicated to modern Western medicine, e. g. the Chinese Academy of Medical Sciences and various medical schools, a series of parallel institutions have been established in China to promote traditional Chinese medicine, such as the Academy of Traditional Chinese Medicine and training institutions. Almost all hospitals in China have a department of traditional medicine. Furthermore, a large number of scientific journals are dedicated to traditional Chinese medicine, covering both experimental and clinical investigations. Medicinal materials constitute a key topic in the treatment of disease according to traditional Chinese medicine. The Chinese

Pharmacopoeia (1985 edition) is therefore divided into two separate volumes, Volume I containing traditional Chinese medicinal materials and preparations and Volume II containing pharmaceuticals of Western medicine. The oldest Chinese review of medicinal materials, Shennong Bencao Jing (100-200 A. D.), covered 365 herbal drugs. The classic compilation in this field, Bencao Gangmu (Compendium of Materia Medica), was published in 1578 by Li Shi-zhen and recorded as many as 1898 crude drugs of plant, animal and mineral origin.
