We know science is awesome, as are its achievements. Yet so far scientists have managed to sidestep the most awesome reality of all, the true nature of human life, the source of their own genius. How is it that in the overwhelming immensity of the cosmos, on microscopic earth, human beings exist? We have not yet looked reality in the face and perceived the nobility and grandeur of who we are, each of us having a responsibility in the universe and being part of a vast and continuing process, which can only emerge from the shadows and darkest corners of our thought when we step aside away from all the noise. 'You Matter' encourages people to think more deeply about the phenomenon of existence, what it means to be a unique human person, and how in unity with one another we can build a future in these uncertain times.

Delia Smith has always been most concerned with the quality and flavour of the ingredients she uses, and nothing comes fresher than fruit, vegetables and herbs from your own garden. So, when the opportunity arose for her to work with her longstanding friend, garden expert Gay Search, to create her own kitchen garden, she seized the chance. This guide, now available in paperback, and written by Gay with 56 recipes from Delia, is for those who are interested in good food - free from pesticides - and who want to try their hand at growing their own. It follows a year in the life of Delia's kitchen garden, with a chapter devoted to each month, containing detailed advice on sowing and planting, fruit and vegetable varieties and how to harvest. With failsafe Delia Smith recipes that use the home-grown produce at its peak, this guide is suitable for first-time horticulturists and cooks of all levels. The book is lavishly designed and has over 300 colour photographs.

A guide to basic cooking that includes recipes for various occasions.

Vegetarian food has become integrated into mainstream cooking and plays an increasingly important role in many people's lives.
