For years accounting ethics has been viewed as an unimportant adjunct of academic and professional accounting. However, the economic scandals of the early twenty-first century have dramatically nullified this characterisation, with the ruination of investors in Enron, WorldCom, Waste Management, Aldelphia, Tyco and scores of other business concerns raising questions about the adequacy and relevance of academic research into accounting ethics, as well as the ethical nature of professional parties. Presenting important papers that reassess these theories, research studies and professional practices in the field of accounting ethics, this collection scrutinizes the body of knowledge that did not protect the investing public, and examines the current crisis in the credibility of financial reports.

More user-friendly, interactive, and powerful than ever before, this step-by-step guide to professional research is integrated with a NEW online suite of research tools, tutorials, demos, research cases, and links to accounting and business research sites and standards-setting organizations. Users can test their knowledge and research strategies with NEW, active-learning mid-chapter Practice Exercises and a NEW section of end-of-chapter Exercises in each chapter. Completely updated for the Sarbanes-Oxley Act and principles- and rules-based standard setting. The fraud chapter 10 has been updated for the new SAS 99 fraud auditing standards and explains the AICPA’s new anti-fraud program.
