If you're having issues with your plow, check out these three basic troubleshooting tips: 1. Visually Inspect. Your plow electrical system takes the same kind of abuse that your truck's suspension does, a veritable pounding from the asphalt, snow and ice that can easily shake loose or shear important

Electrical connections.

~~Troubleshoot Your Plow Electrical System With 3 Basic Tips~~

Clean your battery leads and posts with a wire brush and fill the water cells to your battery's specifications.

Inspect the wiring and reconnect the battery, including the lead for your plow -- first all positive wiring, then the negative ground. Verify that your battery has a full charge with a battery meter/charger.
