experiments related to the content of general, organic, and biological chemistry courses, as well as basic/preparatory chemistry courses. The labs included give students an opportunity to go beyond the lectures and words in the textbook to experience the scientific process from which conclusions and theories are drawn.

This full-color, comprehensive, affordable manual is intended for a one-semester general, organic, and biochemistry course, preparatory/basic chemistry course, liberal arts chemistry course, or allied health chemistry course. The procedures are written with the goal of simplifying a complicated and often challenging subject for students by applying concepts to everyday life. The first half of the lab manual covers general topics such as chemical and physical properties, elements of the periodic table, types of bonds, empirical formulas, and reaction stoichiometry. These labs form the foundation for future labs, which cover the basics of organic and biological chemistry. Experiments include the classification of organic compounds and the determination of biomolecules. By the end of this course, students should have a solid understanding of the basic concepts of chemistry, which will give them confidence as they embark on various allied health careers.

Features:

- Initiate the study of basic concepts in the general, organic, and biochemistry laboratory by reading through concise introductory material and answering pre-lab questions that familiarize students with the concepts presented in each exercise. The inclusion of color photography and high-quality art promotes engagement and comprehension of the more difficult concepts.
- Investigate the mysteries of matter by following the clearly written procedures and recording data and observations on the provided data sheets. Common techniques are reviewed as needed in Technique Tips boxes

to reinforce the development of basic laboratory skills. OSHA pictograms, and Lab Safety boxes are provided to help students understand any risks associated with specific chemicals and equipment. Integrate knowledge of each laboratory topic by making sense of the data that has been collected. Reflective Exercises galvanize critical thinking and scientific analysis skills to take shape as students make connections between what has been learned and practiced in the hands-on lab and how this knowledge can be applied to a relevant, real-world context.

This full-color, comprehensive, affordable manual is appropriate for two-semester introductory chemistry courses. It is loaded with clearly written exercises, critical thinking questions, and full-color illustrations and photographs, providing ample visual support for experiment set up, technique, and results.

Contains experiments that weave together general, organic, and biochemical concepts to help students construct a coherent framework for understanding chemistry. This is the lab manual to accompany the textbook "General, organic, and biological chemistry : an integrated approach" by Todd S. Deal, Laura D. Frost, and Karen Timberlake.

The seventh edition, by Charles H. Henrickson, Larry C. Byrd, and Norman W. Hunter of Western Kentucky University, offers clear and concise laboratory experiments to reinforce students' understanding of concepts. Pre-laboratory exercises, questions, and report sheets are coordinated with each experiment to ensure active student involvement and comprehension. An updated student tutorial on graphing with

The 48 experiments in this well-conceived manual illustrate important concepts and principles in general, organic, and biochemistry. As in previous editions, three basic goals guided the development of all the experiments: (1) the experiments illustrate the concepts learned in the classroom; (2) the experiments are clearly and concisely written so that students will easily understand the task at hand, will work with minimal supervision because the manual provides enough information on experimental procedures, and will be able to perform the experiments in a 2-1/2 hour laboratory period; and (3) the experiments are not only simple demonstrations, but also contain a sense of discovery. This edition includes many revised experiments and two new experiments. Important Notice: Media content referenced within the product description or the product text may not be available in the

Intended for use in the two-term, freshman-level General, Organic, and Biochemistry course taken by Allied Health students, the Ninth Edition of this widely adopted text includes improved explanations, updated materials, cutting-edge developments, emerging technologies, and revisions to the popular Chemistry in Action sections. Hein, Pattison, Best, and Arena is a market-proven text that provides the most comprehensive coverage of general, organic, and biochemistry available at this level. Experienced authors, Hein, Pattison, Best, and Arena, recognize that both science and mathematics can be daunting subjects to students. They skillfully anticipate areas of difficulty and pace the text accordingly. Particular emphasis is placed on the understanding of how chemical principles relate to their lives and future careers. The authors focus on problem solving over rote memorization and provide a variety of exercises to aid in the development of this essential skill. While the authors have revised and updated sections on inorganic and organic chemistry throughout the text, they particularly focused on incorporating many of the recent developments in biochemistry.
