Sumerians, who lived in what is now southern Iraq during the third millennium B.C. They were the developers of the cuneiform system of writing, perhaps their greatest contribution to civilization, which allowed laws and literature to be recorded for the first time.

History Begins at Sumer: Thirty-Nine Firsts in Recorded ...

From the Tablets of Sumer, Samuel Noah Kramer Sumerian literature constitutes the earliest known corpus of recorded literature, including the religious writings and other traditional stories maintained by the Sumerian civilization and largely preserved by the later Akkadian and Babylonian empires. These records were written in the Sumerian language during the Middle Bronze Age.

The book consists of twenty-five essays strung on a common thread: they all treat of "firsts" in man's recorded history. They are thus of no little significance for the history of ideas and the study of cultural origins. But this is only secondary and accidental, a by-product, as it were, of all Sumerological research.

In Childe's day most researchers agreed that Sumer represented the beginning of civilization. Archaeologist Samuel Noah Kramer summed up that view in the 1950s in his book *History Begins at Sumer*. Yet even before Kramer finished writing, the

History Begins at Sumer: Thirty-Nine...
book by Samuel ...

The very beginnings of man's history are recorded in the strange wedge-shaped marks inscribed upon the tablets of Sumer. Unearthed about a century ago from the mounds in Mesopotamia where they had lain for more than three thousand years, and deciphered only after decades of painstaking work, the tablets tell the story of civilization long forgotten, where culture as we know it was born.

I had fun reading Samuel Noah Kramer's book "History Begins at Sumer". This isn't a typical history book. It doesn't go into any detail at all about the different city-states of Sumer, who ruled what lands, where Sumer was, or even mention any dates or events of any widespread significance, etc.

The political, religious, and social life of one of the world's oldest societies are described by a leading Sumerologist

Which civilization had the first system of law? The first formal educational system? The first tax cut? The first love song? The answers were found in excavations of ancient Sumer, a society so developed, resourceful, and enterprising that it, in a sense, created history. The book presents a cross section of the Sumerian "firsts" in all the major fields of human endeavor, including government and politics, education and literature, philosophy and ethics, law and justice, agriculture and

medicine, even love and family. History Begins at Sumer is the classic account of the achievements of the Sumerians, who lived in what is now southern Iraq during the third millennium B.C. They were the developers of the cuneiform system of writing, perhaps their greatest contribution to civilization, which allowed laws and literature to be recorded for the first time.

This ambitious and well-researched study brings together for the first time translations of the ancient literature concerning the Sumerian god Enki, one of four gods and goddesses who comprised the highest level of the Sumerian pantheon. The very existence of these writings, which date from the Third Millennium B.C., was unknown until about 100 years ago, when their cuneiform script was deciphered. Since then, it has become apparent that Sumerian literature

had a profound and enduring influence on both Biblical and classical Greek literature, and so on the literature of the western world as a whole. Kramer, one of the world's leading sumerologists, has prepared these translations from among the scores of works he has published over the last fifty years; John Maier provides a full interpretive framework that places the translations in their broader comparative cultural context. This rare collection will be of interest to students and scholars in a wide range of disciplines from Near Eastern and Biblical Studies to Mythology and Comparative Literature.

An authoritative sketch of the great myths of the Sumerians, their myths of origins, of creation, the nether world, and the deluge.

people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, New York Times Book Review Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of
