5-Minute Recruiting: Using Voicemail to Build Your Network Marketing Business I've recruited hundreds of distributors and become a top money-earner in my company using voicemail as my primary recruiting tool. I use one-minute voicemail messages to get leads. And I use 5-minute voicemail messages ("sizzle calls") to recruit them. In fact, I've signed up more than a few distributors using ONLY a 5-minute sizzle call. Now, it's your turn. This book shows you everything you need to know to use voicemail messages to build a successful network marketing business. You'll learn how to create a simple "lead capture" voicemail message, and how to use it to get all the leads you want. You'll learn how to create an effective "sizzle call" voicemail message and use it to recruit distributors into your business. You'll learn how to leave a voicemail message (on a prospect's voicemail or answering machine) that gets them to call you back. And you get SCRIPTS you can use as models for your scripts, including actual scripts I use in my business. YOU'LL LEARN How to write scripts that get prospects to say, "I'm interested-tell me more" How long to make your messages-what's too long? What's too short? Where to get a FREE voicemail account for your messages-the service I use and recommend The easiest, "low tech" way to record your messages How to PROMOTE your lead capture message-what I do and recommend (with more scripts) Tracking your numbers-what's a "good" response and how to make it better How to use sizzle calls to quickly find interested prospects-the EXACT method I use How to create scripts for recruiting doctors, lawyers, business owners, and other professionals How to get your first message set up in ONE HOUR or Less! Voicemail messages are the ultimate lead capture and recruiting tool. They're easy to set up, easy to use, and they work like crazy. Instead of spending hours talking to prospects and following-up with them again and again, only to find out they're not interested, voicemail messages let you find out who is (and isn't) interested in a few minutes. If you want to recruit more, and recruit faster, you should be using voicemail messages to build your business. This book shows you how. The book is divided into five parts: Part 1: Lead Capture Messages: Sample scripts and step-by-step instructions for creating your own messages. Part 2: Sizzle Calls: More scripts, and a simple way to create the ideal message for your business. Part 3: Recording and Promoting Your Messages: How to set up your voicemail account, how to record your messages, and how to promote and use those messages. Part 4: How to Leave a Voicemail Message That Gets Prospects to Call You Back: When you should (and shouldn't) leave a message on the prospect's voicemail or answering machine, and what to say if you do. Part 5: Quick Start Guide: A step-by-step checklist of everything you need to get started. Simply put, this book shows you everything you need to know to create and use recorded messages to get more leads, recruit more distributors, and build your network marketing business. -- David M. Ward is an attorney and business owner. He is the author of Recruit and Grow Rich, Recruiting Up, and other best-selling books on network marketing.

Do you want to own a telephone answering service? Would you like a nice double-digit profit every month? A mature answering service can do that for you. That's the good news. The bad? If you don't do it right, it could be the worst decision of your life. You could lose your shirt. Learn the inside story from Peter Lyle DeHaan, PhD, who has spent his career in and around the answering service industry. He's owned, managed, bought, and merged answering services. He's also an industry writer and publisher. And he worked as a consultant. In this essential book, you'll discover: - The precise steps to set yourself up for success - Key shortcuts to minimize risk - The secrets that will make you become profitable faster - How to avoid the surprising mistakes most answering service startups make - If your personality fits this high-risk, high-reward industry You'll learn about equipment, cash flow, and managing a team. And you'll discover a sound growth strategy, how to make the startup phase as short as possible, and the specific methods of thriving answering service companies. If you're considering starting a telephone answering service, this indispensable guide is a must read. Buy How to Start a Telephone Answering Service today and dive into this exciting industry.

This new Springer volume provides a comprehensive and detailed look at current approaches to automated question answering. The level of presentation is suitable for newcomers to the field as well as for professionals wishing to study this area and/or to build practical QA systems. The book can serve as a "how-to" handbook for IT practitioners and system developers. It can also be used to teach graduate courses in Computer Science, Information Science and related disciplines.

This book answers the questions that therapists frequently ask about setting up and running a business. It allows readers to successfully make the journey from being trained in how to conduct professional therapy sessions to running a growing private practice. The material covers a range of issues including: registration with HMRC, money issues, marketing, insurance, and whether to work from home or other premises. The book addresses a number of practical questions, such as: Do I have to register with the information commission? What can I count as legitimate business expenses? What mistakes should I avoid when marketing my practice? How can I easily and cheaply accept card payments from my clients? What help can I get to manage my phone calls? How can I get a website? and, What can I do to increase my personal safety?As counselling in the twenty-first century changes, an increasing number of therapists are using technology to write and store notes, and to communicate with clients - either to arrange appointments, or to conduct them.

This book constitutes the refereed proceedings of the 13th International Conference on Flexible Query Answering Systems, FQAS 2019, held in Amantea, Italy, in July 2019. The 27 full papers and 10 short papers presented were carefully reviewed and selected from 43 submissions. The papers present emerging research trends with a special focus on flexible querying and analytics for smart cities and smart societies in the age of big data. They are organized in the following topical sections: flexible database management and querying; ontologies and knowledge bases; social networks and social media; argumentation-based query answering; data mining and knowledge discovery; advanced flexible query answering methodologies and techniques; flexible query answering methods and techniques; flexible intelligent information-oriented and network-oriented approaches; big data veracity and soft computing; flexibility in tools; and systems and miscellanea.

This book is the result of a group of researchers from different disciplines asking themselves one question: what does it take to develop a computer interface that listens, talks, and can answer questions in a domain? First, obviously, it takes specialized modules for speech recognition and synthesis, human interaction management (dialogue, input fusion, and multimodal output fusion), basic question understanding, and answer finding. While all modules are researched as independent subfields, this book describes the development of state-of-the-art modules and their integration into a single, working application capable of answering medical (encyclopedic) questions such as "How long is a person with measles contagious?" or "How can I prevent RSI?". The contributions in this book, which grew out of the IMIX project funded by the Netherlands Organisation for Scientific Research, document the development of this system, but also address more general issues in natural language processing, such as the development of multidimensional dialogue systems, the acquisition of taxonomic knowledge from text, answer fusion, sequence processing for domain-specific entity recognition, and syntactic parsing for question answering. Together, they offer an overview of the most important findings and lessons learned in the scope of the IMIX project, making the book of interest to both academic and commercial developers of human-machine interaction systems in Dutch or any other language. Highlights include: integrating multi-modal input fusion in dialogue management (Van Schooten and Op den Akker), state-of-the-art approaches to the extraction of term variants (Van der Plas, Tiedemann, and Fahmi; Tjong Kim Sang, Hofmann, and De Rijke), and multi-modal answer fusion (two chapters by Van Hooijdonk, Bosma, Krahmer, Maes, Theune, and Marsi). Watch the IMIX movie at www.nwo.nl/imix-film. Like IBM's Watson, the IMIX system described in the book gives naturally phrased responses to naturally posed questions. Where Watson can only generate synthetic speech, the IMIX system also recognizes speech. On the other hand, Watson is able to win a television quiz, while the IMIX system is domain-specific, answering only to medical questions. "The Netherlands has always been one of the leaders in the general field of Human Language Technology, and IMIX is no exception. It was a very ambitious program, with a remarkably successful performance leading to interesting results. The teams covered a remarkable amount of territory in the general sphere of multimodal question answering and information delivery, question answering, information extraction and component technologies." Eduard Hovy, USC, USA, Jon Oberlander, University of Edinburgh, Scotland, and Norbert Reithinger, DFKI, Germany
