~~Human life, in all its manifestations, has immeasurable social and economic value. Since ancient times, human beings have tried to put in place systems to sustain and flourish in the face of adversity. In modern times, life insurance is one such financial arrangement that provides social and economic security to individuals and to the communities. Awareness of the basic features and categories of insurance is important in today's life insurance market where all companies are offering a number of innovative products with multiple features. Divided into three parts, this book incorporates the basics of life insurance, risk management, and health and micro-insurance, in detail. Part I (Concepts, Principles and Processes) systematically defines life insurance, its legal contract and characteristics, marketing and distribution processes involved, and the future trends. Part II (Risk Management, Underwriting, Reinsurance and Claims) explicates the importance of risk management, the process of underwriting, and the types and concepts of reinsurance and claims. Part III (Employee Benefits, Pensions, Annuities, Micro-insurance and Health Insurance) covers allied topics, such as pension products, micro-insurance and health insurance which are increasingly becoming important for the industry for both the social and commercial perspectives.~~

~~This book is published open access under a CC BY 4.0 license. This open access book provides an overview of childlessness throughout Europe. It offers a collection of papers written by leading demographers and sociologists that examine contexts, causes, and consequences of childlessness in countries throughout the region.The book features data from all over Europe. It specifically highlights patterns of childlessness in Germany, France, the United Kingdom, Finland, Sweden, Austria and Switzerland. An additional chapter on childlessness in the United States puts the European experience in perspective. The book offers readers such insights as the determinants of lifelong childlessness, whether governments can and should counteract increasing childlessness, how the phenomenon differs across social strata and the role economic uncertainties play. In addition, the book also examines life course dynamics and biographical patterns, assisted reproduction as well as the consequences of childlessness. Childlessness has been increasing rapidly in most European countries in recent decades. This book offers readers expert analysis into this issue from leading experts in the field of family behavior. From causes to consequences, it explores the many facets of childlessness throughout Europe to present a comprehensive portrait of this important demographic and sociological trend.~~

~~This first collection of selected articles from researchers in automatic analysis, storage, and use of terminology, and specialists in applied linguistics, computational linguistics, information retrieval, and artificial intelligence offers new insights on computational terminology. The recent needs for intelligent information access, automatic query translation, cross-lingual information retrieval, knowledge management, and document handling have led practitioners and engineers to focus on automated term handling. This book offers new perspectives on their expectations. It will be of interest to terminologists, translators, language or knowledge engineers, librarians and all others dependent on the automation of terminology processing in professional practices. The articles cover themes such as automatic thesaurus construction, automatic term acquisition, automatic term translation, automatic indexing and abstracting, and computer-aided knowledge acquisition. The high academic standing of the contributors together with their experience in terminology management results in a set of contributions that tackle original and unique scientific issues in correlation with genuine applications of terminology processing.~~
