Maintaining the proven methodology and pedagogy of the Beer and Johnson series, Statics and Mechanics of Materials combines the theory and application behind these two subjects into one cohesive text focusing on teaching students to analyze problems in a simple and logical manner and, then, to use fundamental and well-understood principles in the solution.

The resultant of the internal forces for an axially loaded member is normal to a section cut perpendicular to the member axis. The force intensity on that section is defined as the normal stress. Beer and Johnston's Mechanics of Materials is the uncontested leader for the teaching of solid mechanics.
