WebSphere Application Server Community Edition ...

Migrating from Community Edition to other WebSphere Application Server products  
In fact, since all WebSphere Application Server products, including Community Edition, support the Java 2 Enterprise Edition (J2EE) specification, migrating from Community Edition to another WebSphere Application Server product is relatively easy, though some areas do require special care during the migration process.

WebSphere Application Server Community Edition ...

Migrate and deploy to Community Edition. Now, for perhaps the most uneventful migration exercise thus far, you will deploy the application to the Community Edition environment. Since Community Edition is largely composed of Geronimo (with the exclusion of a few non-J2EE modules), the migration requires very little work.

WebSphere Application Server Community Edition ...

WebSphere Application Server Community Edition (WASCE) was a free-of-charge, certified Java EE 6 application server for building and managing Java applications. Until September 30, 2016, it was IBM's supported distribution of Apache Geronimo that use Tomcat for servlet container and Axis 2 for web services. Another difference from Apache Geronimo is that WASCE came with DB2 and Informix ...
