Winners will be announced on this website on 12th November and afterwards in the Nov/Dec issue of Construction Computing Magazine. If you would like to be involved in the leading industry event then please contact: Julie Cornish Event Sales E: j.cornish@btc.co.uk T: +44(0)1689 616 000 .

Construction Computing Awards 2020

Safe, secure, and successful events to restart at ExCeL London: We are looking forward to hosting safe, secure, and successful business events and conferences in line with Government guidance.

Program construction is about turning specifications of computer software into implementations. Recent research aimed at improving the process of program construction exploits insights from abstract algebraic tools such as lattice theory, fixpoint calculus, universal algebra, category theory, and allegory theory. This textbook-like tutorial presents, besides an introduction, eight coherently written chapters by leading authorities on ordered sets and complete lattices, algebras and coalgebras, Galois connections and fixed point calculus, calculating functional programs, algebra of program termination, exercises in coalgebraic specification, algebraic methods for optimization problems, and temporal algebra.

Design Computing will help you understand the rapidly evolving relationship between computing, designers, and the many different environments they create or work in. The book introduces the topic of design computing, and covers the basics of hardware and software, so you don ' t need to be an expert. Topics include the fundamentals of digital representation, programming and interfaces for design; the shifting landscape of opportunity and expectation in practice and pedagogy; placing sensors in buildings to measure performance; and the challenge of applying information effectively in design. The book also includes additional reading for those who wish to dig deeper into the subject. Design Computing will provide you with a greater awareness of the issues that permeate the field, opportunities for you to investigate, and perhaps motivation to push the boundaries.

This set of proceedings volumes provides a broad coverage of basic and applied research projects dealing with the application of engineering principles to both food production and processing. The set consists of the following four volumes: Land and water use, Agricultural buildings, Agricultural mechanisation and Power, processing and systems. Includes about 450 papers from over 50 countries worldwide, drawn from the Eleventh International Congress on Agricultural Engineering, Dublin, 4-8 September 1989.

In recent years, Information Technology (IT) has been transforming business practice in many sectors resulting in efficiency gains and improved services for the client. The construction industry lags behind other manufacturing and service industries in adopting the new technology. To promote the wider use of IT in construction, it is essential to equip practitioners and graduates of construction related disciplines with knowledge of existing construction IT applications. This book provides an overview of a broad range of IT applications currently available for all stages throughout the life cycle of a building project, from essential office and information management through to computer-aided design (CAD), cost estimating, project planning and scheduling, and facilities management and building maintenance. It is an invaluable and handy reference for construction professionals and clients, as well as being a clear and comprehensive text for students studying construction, building or architectural courses.
