Social Science Learning in Schools: Perspective and Challenges locates the teaching and learning of social science within the larger perspective and aims of education. It emphasizes the need to take the teaching of social science beyond the confines of contemporary ideological debates, into the realm of pedagogical theory. It presents critical perspectives on curriculum design, textbook development and social science pedagogy. Discussions on pedagogy are situated in analyses of Eklayva's social science textbooks which were in use for over 15 years in government schools in Madhya Pradesh. The book explores the integral role of the teacher, importance of textbooks, and methods of social science enquiry in school teaching-learning. It interrogates integrated approaches to social science education, and notions of nationalism and identity. The book will serve as a seminal social science text for Indian elementary teacher education programmes. University departments of education, research institutions, NGOs and development organisations working in education, literacy and child development will find it an invaluable elementary education resource.

Certificate Mathematics is a two-year revision course for students following the General Proficiency Syllabus in Mathematics of the Caribbean Examinations Council. It provides a programme for thorough review and consolidation of all the basic aspects of mathematics needed for success in the examination. Incorporates a very large number of graded exercises to help student's learn by doing. Includes chapter summaries and points to remember that enhance the usefulness of the book for consolidation and revision. Contains specimen tests in preparation for the multiple choice and long answer papers of the CXC examination. Used systematically, Certificate Mathematics will provide students with a firm foundation for success in their CXC

mathematics examinations.

This ground-breaking book gives an accessible overview and synthesis of current knowledge of relevance to the development of excellence in autism education. By situating understandings of autism within a ' bio-psycho-social-insider ' framework, the book offers fresh insights and new ways of thinking that bring together global pedagogic practice, research, policy, and the insider perspective. Guldberg critiques current notions of Evidence-Based Practice and suggests ways of bridging the research-practice gap. She explores the interrelationship between inclusive principles, distinctive group learning needs and the individual needs of the child or young person. Eight principles of good autism practice provide a helpful framework for how education settings and practitioners can adapt classroom environments and teaching so that autistic children and young people can thrive. Written for anyone who wants to make a difference to the lives of autistic pupils, *Developing Excellence in Autism Practice* provides practitioners and students on education courses with tools for best practices, and shows how to draw on these to implement true positive change in the classroom.

This book will provide readers with an overview of the core knowledge and issues in public mental health, and a guide for students and practitioners on the evidence and tools available to help them develop Public Mental Health programs that work in practice.

The first edition of *Community Mental Health* quickly established itself as one of the most comprehensive and timely books about mental health practice in community settings. Readers will find that this new edition is also on the leading edge of the field, providing the most up-to-date research and treatment models in the field. Experts from a wide range of professions – social work, nursing, psychology, psychiatry, public health, sociology, and law – explore the major trends, best practices, and policy issues shaping community mental health services today. Coverage of each topic shifts the focus from management to recovery in the treatment of chronically mentally ill patients. Coverage of organizational and policy issues gives students a

head start on mastering the overarching factors that shape their field. This book offers the greatest breadth of coverage available, including hot-button topics like the following: evidence-based treatments neuropsychiatric perspectives Diversity Substance abuse New chapters cover a variety of special populations, which ensures students are prepared to work with a wide range of issues, including: returning veterans military families and families of the mentally ill people affected by the "Great Recession" teenagers children the homeless Students preparing to become mental health professionals, practitioners in community mental health settings, and policy planners and advocates engaged in the evaluation and development of programs in the human services will find this text to be an invaluable resource in their training and work. A collection of supplemental resources are available online to benefit both instructors and students. Instructors will find PowerPoint slides and test banks to aid in conducting their courses, and students can access a library of helpful learning activities, suggested readings and resources, and a glossary of important terms. These materials can be accessed at <http://www.routledge-mentalhealth.com/cw/rosenberg>.

Assessment in Practice explores timely and important questions in relation to assessment. By examining the relationship between identity, culture, policy and inclusion, the book investigates the conflicted and fractured battleground of assessment, and challenges current and practiced understandings of assessment practice. The authors encourage the reader to reconceptualise assessment as a sociocultural practice. Each chapter studies a key theme in the understanding of assessment policy and practice from a sociocultural perspective and provides questions to prompt reflection on the key assessment concepts outlined in the book. Using culture as both a lens and analytic tool, the chapters examine topics such as The social order of assessment, how assessment works in the world and how learning could be assessed Perspectives on social justice and assessment, with a particular focus on social class and other potential inequalities on the experiences of assessment for young people Discussions of ability and the assessment of students with special education needs as well as the role of inclusivity in assessment practice Written by leading academics from University College Cork, the third volume in the successful Routledge Current Debates in Educational Psychology series is an essential read for researchers and postgraduate students in educational research and education psychology.

In the years following the Napoleonic Wars, a mysterious manuscript began to circulate among the dissatisfied noble elite of the Russian Empire. Entitled The History of the Rus', it became one of the most influential historical texts of the modern era. Attributed to an eighteenth-century Orthodox archbishop, it described the heroic struggles of the Ukrainian Cossacks. Alexander Pushkin read the book as a manifestation of Russian national spirit, but Taras Shevchenko interpreted it as a quest for Ukrainian national liberation, and it would inspire thousands of Ukrainians to fight for the freedom of their homeland. Serhii Plokhyy tells the fascinating story of the text's discovery and dissemination, unravelling the mystery of its authorship and tracing its subsequent impact on Russian and Ukrainian historical and literary imagination. In so doing he brilliantly illuminates the relationship between history, myth, empire and nationhood from Napoleonic times to the fall of the Soviet Union.

The evolution versus creationism conflict is here to stay. Even after their devastating defeat in the *Kitzmiller v. Dover* decision, advocates of intelligent design and other forms of creationism continue to revise their strategies for undermining the teaching of evolution-and thus of science in general-in American schools. In this revision of *Evolution vs. Creationism*, Eugenie Scott, one of the leading proponents of teaching evolution in the schools, describes these ever-changing efforts to undermine science education and shows what students, parents, and teachers should be aware of to help ensure that American science education prepares our students to compete in the 21st century. This second edition of *Evolution vs. Creationism* will help readers better understand the issues involved in these debates. It expands and updates the original work with an insider's look at the *Kitzmiller v. Dover* trial, a new selection of primary source documents on the Creationism/Evolution controversy in the media, and an up-to-date analysis of the most recent creationist challenges across the country. The revision also expands and updates the collection of primary source documents that address cosmology, law, education, popular culture, and religious issues from all sides of the debate, as well as the resources for further information.
