Rhinoplasty: Craft and Magic, by Dr. Mark B. Constantian, a master work by a master surgeon, is destined to change the way you practice rhinoplasty. It is essential reading for all surgeons interested in nasal surgery. For many surgeons, rhinoplasty is seen as a complex and often mystifying operation. This book takes the mystery out of rhinoplasty, making it both understandable and controllable, demonstrating that function can always be improved, and showing how particular postoperative shapes can be achieved with a high level of certainty. It will provide you with the basic skills and understanding of how rhinoplasty works in both primary and secondary nasal operations. This comprehensive book is packed full of useful information to help you improve your rhinoplasty results. An applied anatomy chapter discusses the critical anatomic variants that are important to diagnose and how these affect the end

result during different operative procedures, such as reduction of the dorsum. The surgeon learns what to expect after each operative step, and to understand how to interpret what is seen in the operating room. Another chapter focuses on the airway; it describes how to avoid creating airway problems and how to correct these problems when they occur. Multiple grafting techniques are also described with step-by-step details of how to use each type of autogenous donor material and the secrets for making the grafts work the first time. Important information is included on how you work with the different types of soft tissue covers with different patient types and specific clinical problems, including cleft lip nose, the traumatized nose, the older patient, the narrow nose, the thick-skinned nose, and the open rhinoplasty deformity. All common secondary problems are addressed in detail, such as secondary dorsal tip and supratip deformities. Numerous innovative features and tips and tricks are included to guide the reader and enhance understanding. Icons introduce each technique, providing a visual summary of the operative strategy used for each problem discussed. Summaries of surgical plans precede each procedure. Surgical solutions to specific problems are grouped together and illustrated with step-by-step technique. Long-term results are analyzed, with inclusion of many 5-, 10-, and 15-year results. Four DVDs with operative video complement and expand on the techniques described in this amazing two-volume set.

Although porous silicon is rapidly attracting increasing interest in various fields, there is currently no up to date general introduction to basic properties and potential applications. Until now. This book focuses on the fundamentals of silicon porosification and properties of porous silicon, including electrical, luminescence, optical, thermal properties. Processing of porous silicon also will be discussed in this part. Comprehensive and up to date, this is a technical resource and guide for all those involved in the research, development and application of porous silicon in various areas of science and technology.

Seldom does a book achieve status as a classic in its first edition, but *The Art of Aesthetic Surgery* by Foad Nahai has been hailed as a masterpiece since its inception. Reviews have been universally laudatory, and residents and experienced practitioners alike have embraced this work as the ultimate resource on all things aesthetic. Now, this landmark work has been totally revised and updated with over 40 new chapters (many with new authors) and every chapter has been revised to reflect the latest trends, techniques, and information. This three-volume set also includes seven DVDs with 24 operative videos.

Comprehensive Coverage 93 chapters in three volumes cover the full range of cosmetic medical treatments and aesthetic operations. Topics include: Hair transplantation and brow lift Eyelid surgery Laser resurfacing and chemical peels Tissue fillers and fat grafting Rhytidectomy and face and neck lift Facial implants Rhinoplasty and ptoplasty Lip rejuvenation Breast augmentation, reduction, and mastopexy Surgical, noninvasive, and minimally invasive body contouring Liposuction To address the modern physician's need for business acumen as well as surgical skill, three chapters focus on practice management, ranging from practice model options, staff and financial management, marketing and communications, and legal issues.

World-Renowned Authors Dr. Foad Nahai is an acknowledged leader in aesthetic surgery. He has personally written a third of the chapters for this three-volume work. His contributors, representing the "who's who" of aesthetic surgery, provide detailed accounts of their techniques for the different operations, as well as the planning process so crucial to producing excellent results. Help with Decision-Making Of particular note are the clinical decision-making chapters authored by Dr. Nahai. This invaluable insight provides readers with a unique overview of the various options for each problem, along with his preferred solutions. Complete with algorithms and case studies, this problem-solving feature offers the expert guidance necessary to sort through options, understand their advantages and limitations, and make the best choice for each patient.

Necessary Anatomy Key chapters introducing each major anatomic region or topic area focus on applied anatomy and provide essential information that the surgeon needs to know to execute these surgical maneuvers safely and effectively.

Reliable Format This new edition maintains the same features that made the previous edition so popular, including beautiful medical illustrations, large type for readability, and a consistent, comprehensive approach. The semi-atlas format features the applicable images located next to legend text for enhanced clarity.

This issue of *Facial Plastic Surgery Clinics*, guest edited by Drs. Paul S. Nassif and Julia L. Kerolus, is devoted to **Revision Facial Plastic Surgery: Correcting Bad Results**. Articles in this outstanding issue include: Correction of Ectropion and Lower Eyelid Retraction Following Blepharoplasty; Complications Associated with Fat Grafting to the Lower Eyelid; Approach to Correction of Septal Perforation; Correction of the Over-reduced Nose; Management of Post-Surgical Empty Nose Syndrome; Correction of Nasal Pinching; Approach to Alar Notching; Treatment Protocol for Compromised Nasal Skin; Management of Surgical Scars; Common Complications in Rhytidectomy; Neck Deformities in Plastic Surgery; Filler Associated Vision Loss; Management of Lip Complications; Tips to Avoid Complications Following Mohs Reconstruction; and Miscellaneous Botched Nasal Procedures.
