Evaluation of a Digital Camera and a Smartphone ...

Evaluating the usability of smartphone applications is crucial for their success, so developers can learn how to adapt them considering the dynamicity of mobile scenarios. The HCI community recommends considering different requirements when evaluating those applications, such as quantitative data (metrics), subjective evaluation (users' impressions) and context data (e.g. environment and devices conditions).

Smartphone Applications Usability Evaluation: A Hybrid ...

Photograph-based smartphone applications had similar considerations, especially when the examiner was taking the picture and in positioning the virtual goniometer on anatomic landmarks to measure the angles under investigation. 12 Errors could be made if the picture was taken short of maximal ROM or if the photograph was mistimed (and not picked up). Care needed to be taken in measuring the angles under investigation in the photographs, especially in placing markers on the desired anatomic ...

The aim of this study was to identify smartphone Kegel and pelvic floor exercise applications (apps) and identify those with superior functionality, features, and accuracy. Methods We identified a complete list of Kegel and pelvic floor exercise applications by searching iTunes and Google Play stores for "pelvic floor," "pelvic floor exercises," "Kegel," and "Kegel exercises."

Evaluation of Smartphone Pelvic Floor Exercise ...

SMART is a mnemonic acronym, giving criteria to guide in the setting of objectives, for example in project management, employee-performance management and personal development. The letters S and M generally mean specific and measurable. Possibly the most common version has the remaining letters referring to achievable (or attainable), relevant, and time-bound.

SMART criteria - Wikipedia

SLAKES is a smartphone application created by the University of Sydney, Australia, that quantifies aggregate stability through a simple experiment. The experiment requires three pea-sized soil peds, a petri dish of water, and a smartphone running the SLAKES application.
