2nd Edition
An understanding of
statistics and

experimental design is
essential for life science
studies, but many
students lack a
mathematical
background and some
even dread taking an
introductory statistics
course. Using a
refreshingly clear and

encouraging reader-friendly approach, this book helps students understand how to choose, carry out, interpret and report the results of complex statistical analyses, critically evaluate the design of experiments and proceed to more advanced material.

Taking a straightforward
